PROTECTION / FITTING / DESIGN / QUALITY

A man with a beard and sunglasses, wearing a dark leather motorcycle jacket and pants, is sitting on a black Triumph motorcycle. The motorcycle is parked against a light-colored wall. The man is looking down and to the left. The motorcycle has "TRIUMPH" written on the fuel tank. The background shows a wall and some architectural details.

Message from CEO

Welcome to Bashir Impex, where passion fuels performance. We're driven to craft exceptional Motorcycle Boots, Gloves & Clothing that embody innovation, quality, and style. Our customers are the heartbeat of our organization, and we're committed to surpassing their expectations. With a relentless pursuit of excellence,

let's ride, compete, and triumph together!

Sincerely,
Ali Raza

*OUR COMMITMENT CAN BE STATED
IN FOUR WORDS: **PROTECTION.
FITTING. DESIGN. CONSISTENCY.***

PROTECTION – Protection is a top priority when it comes to motorcycle gloves, boots, and clothing. These essential gear pieces are designed to safeguard riders from the impact and abrasion of falls, as well as from environmental elements. High-quality gloves feature reinforced knuckles and palms, while durable boots offer ankle support and tough soles to absorb shocks. Similarly, motorcycle clothing is made from abrasion-resistant materials and includes built-in armor for extra protection. Investing in well-designed protective gear not only enhances safety but also contributes to a more comfortable and confident riding experience.

FITTING – Proper fitting of motorcycle gloves, boots, and clothing is crucial for both safety and comfort. Gloves should fit snugly but allow for flexible movement, ensuring you can easily operate controls without excess material interfering. Boots need to provide a secure fit around the ankle and foot while being comfortable enough for extended rides. Motorcycle clothing, including jackets and pants, should be tailored to your body shape, offering full coverage and flexibility without being too tight or loose. A well-fitting gear ensures maximum protection and enhances overall riding comfort, allowing you to focus on the road ahead.

CONSISTENCY – is the cornerstone of success in any endeavor, at Bashir Impex we maintain a steady & reliable approach to every operation we do, which builds trust & provides a seamless experience to our customers every time they order.

DESIGN – At Bashir Impex, we believe that functional aesthetics are crucial. Each part of our Gloves Boots and Clothing is carefully designed with its specific role in mind whether it's protection, comfort, ventilation, or abrasion resistance. This is why we create every component individually, rather than using standard pieces, making each Product unique and distinctive. While others may try to replicate our designs, none can match the originality of Bashir-Impex. So, why settle for anything less? Choose the original.

*OUR **MANUFACTURING** JOURNEY*

Journey of 2.5 Decades Began in 1997 by Mr. Muhammad Bashir, by setting up a production line of Gloves. As a worker himself his excellent workmanship really made the company known in the international market. Later on, His Sons joined this legacy & started manufacturing various products like Motorcycle Apparel & Accessories, which generated good revenue & brought new customers on board.

In 2015 young blood (Qaseem & Ali) took the Challenge to set up a new & innovational Factory of Motorcycle Boots. It took more than a Year to get the manufacturing system aligned. High Tech Machines & experienced staff were hired to make High-End Motorcycle footwear.

Goal was to make Protective, Comfortable & Functional Motorcycle Boots. Fortunately, none of the existing competitors were doing all 3 features in their Boots. To achieve that difficult goal, architectonic R&D was done & not only that, products were tested & checked various times before presenting them to Customers/Brands.

Now State of the art production facility is making exclusive Products which are being exported to 5 continents & more than 35 different countries around the globe.

Our mission is to work like a real partner with our Customers & make BASHIR IMPEX the most comfortable Manufacturing Source for them. If we have to describe our success in a Single word, that is "CONSISTENCY," in every aspect, from Product Development to Bulk Order production, From Raw Materials selection to packaging. Furthermore, as per the latest international rules & regulations, all our products are made as per CE and UKCA standards.

Our Vision is to be the Biggest, Brightest & most Appreciated Motorcycle Boots, Gloves & Clothing Factory in the World. So Get on Board & Join this venture which will take your brand to NEXT LEVEL.
